

## Seminar Announcement

*Another installment of the science-related Seminars presented by MESA, Bridges to Baccalaureate (SFSU) and the Skyline College Chemistry Department*

---

*Monday, May 18, 2009*

Understanding and Eliminating the Environmental Impacts of Every Day Products:

*A Case Study in Yogurt*

*by Anjana Richards, M.S. Env. Mgmt., B.S. Civil Eng.*

How is the environment affected by the food you eat and the products you use? What can be done to minimize pollution and energy use over the whole life cycle of a product? These questions are discussed within the context of the production, distribution, use and disposal of a standard 6 oz. cup of yogurt.

Anjana Richards is an independent consultant working in green business strategy, manufacturing waste reduction, and environmental risk management for companies in the pharmaceutical, automotive, food, and technology industries.

*Time: 1:15 pm*

*Room: Building 7, Room 7-106*
