

Dial-in Internet and eMail Service

Mac OS 9 Setup Instructions

Do-it-yourselfers (advanced users)

Configuring Your Email Program

- **Outgoing / Sending Server:** mail.smccd.net
- **Incoming / Receiving Server:** mail.smccd.net

Login name & Password: Use District email username (without @smccd.net) & password)
See [Reconfiguring Your SMCCD Email](#) for details on configuring your email client.

Setting Your Network Preferences

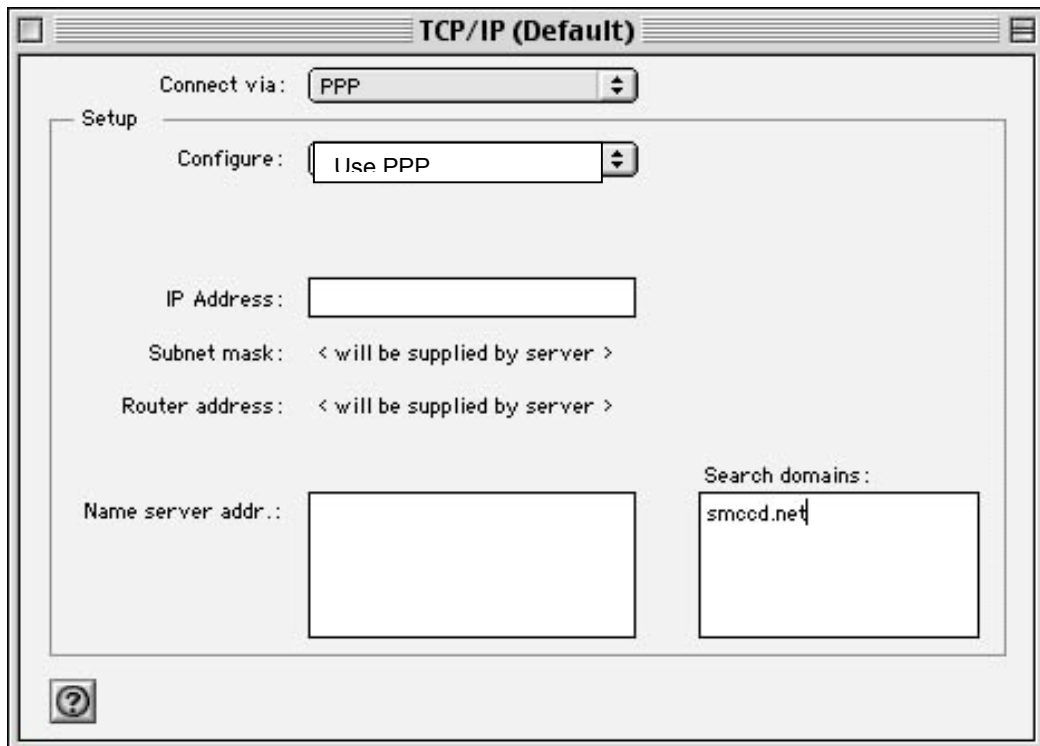

- **Search Domain:** smccd.net
- **Modem Number:** 522-9930
- **Login:** yourname
- **Password:** (your District email password)

Macintosh OS9

Connect your phone line to the modem port of your computer.

Select: Apple Menu > Control Panels > TCP/IP

Enter: Connect via: PPP; Configure Use PPP; Search Domains: smccd.net (optional)

Dial-in Internet and eMail Service

Mac OS 9

Setup Instructions

Select: From the Apple Menu > Control Panels>Remote Access

Enter: Name: (your email username) (e.g. smithj)

Password: (your District email password)

Number: 522-9930

Options Button: Set the access to disconnect after 10 minutes idle. (Since access to the modem is shared by others in our District, you would not want to walk away from your computer and have it monopolize the modem port inadvertently, or incur additional toll charges if you are in an extended calling area.)

To Connect

Select either

1. Apple Menu >Control Panels> Remote Access > **Connect**
2. Control Strip > Remote Access icon > **Connect**

Please contact the helpdesk if you are encountering connection difficulties.
