

# HBA for Math 811 GW

Name: \_\_\_\_\_

During the semester you are required to complete 24 hours of instruction outside of class to help you with the material from the class. The easiest way to do it is to attend Michael's Supplemental Instruction class on Friday's from 12:10 - 1:30. If you go each week, just write that on the sheet, initial it yourself, and I will check it against Michael's records.

If you can't make that time, or can't stay the whole time, please have the tutor or teacher that you are working with fill out this form every time you get help. You may go to the Learning Center, my office, or any other place where you can meet with a tutor or teacher.

Each line represents 20 minutes of time. You must complete an average of four 20 minute lines each week (equivalent to one of Michael's classes), but you may fall behind and do fewer than 80 minutes in one week, or get ahead and do more than 80 minutes in one week. As long as you complete all 64 lines during the semester. But PLEASE don't save the majority until the end!

I will give you the first line for free assuming (hopefully correctly!) that you will come in to office hours at least once during the semester.
