
Project 5

Kevin Nilson, <http://www.smccd.net/accounts/nilson/>

CS 381 Project 5, Java Programming I, Fall 06

1. Assignment

Due - September 29

Write Unit Tests For the Code used in Project 4.

- Your Java Classes should use the package `edu.smccd.cis381.fall2006.project4` Yes this is correct it should use `project4` not `project5` in the package. This will allow you to test protected methods.
- For examples you can look in the forum at the JUnit Test Cases I used to grade past projects. You can also look to the JUnit website for help and examples.

I expect 4 classes for this assignment. Each class should extend `junit.framework.TestCase`

- `CashRegisterUnitTest`
- `MoneyUnitTest`
- `StoreItemUnitTest`
- `ReceiptUnitTest`

Please review "How to Turn in Assignments" for information about how to submit and other requirements.

2. Grading

- You will be graded on how well your unit tests are written. Make sure you test boundry conditions such as null or out of range inputs.
