# Exercise 1

Kevin Nilson, <http://www.smccd.net/accounts/nilsonk/smc2006springcis125/s06cis125welcome.html>

## Abstract

CS 125 Exercise 1, Visual Basic .NET I, Spring 2006

## Assignment

Due - January 24, 2006 - resubmissions by January 26, 2006

Write a simple Visual Basic .NET Program to give the instructor information about yourself. Use several labels and TextBoxes to type text. Tell me your major, why you are taking the class, your email address, your previous programming experience, your previous computer experience, and other information

3 buttons should appear on the Form. One button to clear the form. One button to fill in the data. One button to exit: `Me.Close()`

`Environment.NewLine()` should be used at least once to provide line breaks

```
Me.TextBoxAboutMe.Text = "My name is Kevin Nilson" + Environment.NewLine()
```

Make sure `ReadOnly` is set to `True` on all `TextBoxes`

All Components should have meaningful names. `TextBox1` is not a meaningful name. `TextBoxStudentName` is a meaningful name
